

COUNTY COMMISSIONER DISTRICT 1

| John Kefalas (D) | Questions | Justin Smith (R) |
|--|--|--|
| Yes | Are county land-use regulations and permitting processes doing enough to address the interest of the public? | Undecided |
| updating land use code to address affordable housing needs | If you answered "no" to the question above, what change(s) would you pursue? (25 words or less) | Don't fully understand the intent of the question. However, there are many concerns about the ease of land use process |
| Yes | Is homelessness a problem in Larimer County? | Yes |
| eviction/homelessness prevention, permanent supportive housing, 24/7 homelessness campus with comprehensive services; NoCo Continuum of Care | If you answered "yes" to the question above, how should this be addressed? (25 words or less) | We need to establish coordinated approach with the municipalities across the county. It must focus on measurable, positive outcomes rather than good intentions. |
| Yes | Is there anything the county can do to address the lack of affordable housing? | Yes |
| public/private partnerships; implement county affordable housing strategy - support access, preserve and create affordable housing; establish a local housing trust fund | If you answered "yes" to the question above, what do you recommend? (25 words or less) | Yes, we need to remove bureaucratic barriers that drive up costs. We must keep in mind that a strong vibrant economy is the best tool. |
| No | If the Front Range continues to be unable to meet the EPA's emission standards, the cost of gasoline will rise due to a federally-imposed tax. Should Larimer County impose measures on its residents to reduce emissions? | No |
| incentivize measures to reduce emissions | If you answered "yes" to the question above, what do you | *We need to understand that our emissions have not increased, but the current situation is a result of |

recommend? (25 words or less)

changes to the standards that
make put us in the category we are
in.
